(2)

UNIT-3

2 Marks questions

1. What is client side Scripting?
2. What is PHP?
3. What is Server Side Scripting?
4. What is Node.js?
5. What is Front End Web Development?
6. How to create a variable in PHP? Give an example.
7. What is HTML?
8. What is CSS?

5 Marks questions

1. Explain Basic HTML tags with example.
2. What is BootStrap Framework? write the features of BootStrap.
3. What is CSS? Write the features of CSS.
4. What is AngularJS Framework? Explain its features.
5. What is JavaScript? Write the features of JavaScript.
6. Explain Model-view Controller Architecture
7. Mention the diffrence between Client side and Server Side Scripting.
8. Explain the features of PHP.
9. What is MVC Architecture? Write the advantages and disadvantages of MVC.
10. What is Node.js? Explain the features.

8 Marks questions

1. Explain Frames in HTML with an example.
2. What are the different CSS styling techniques? Explain with an example.
3. Explain the various elements of web development.
4. Explain functions in PHP.
5. Explain client side Scripting and Server Side Scripting in detail.
6. Explain arrays and control structures in PHP.
