Sindhu S

Seeking a challenging position in a reputable organization to expand and utilize my learning, skills and knowledge. I thrive in environments that foster growth and present stimulating challenges. Possess strong analytical skills, problem-solving abilities, and a keen interest in continuous learning.

PROJECTS

Deep Learning Methods For Tuberculosis Diagnosis from Chest Radiographs

I developed the application using Spring Boot and Spring Data JPA, which were designed to manage hospital-related activities by implementing key features. Automation is achieved through the utilization of RESTful APIs.

Technology Used: Python , CNN

Beyond Boundaries: Engineering Journeys in Rural Communities Through XR

— Awarded 'Best Project of the Year' at the State-Level Poster Presentation and Exhibition by KSCST 2024

A dynamic project implemented through advanced 3D modeling skills with Blender and interactive application development using Unity to create cutting-edge virtual experiences empowering users to make informed career choices within the engineering field.

Technology Used: Blender, Unity3D.

AR Playing Cards

Developed an interactive augmented reality (AR) experience using playing cards as the marker. The project aimed to blend traditional gaming with modern technology, providing users with an immersive and engaging experience.

Technology Used: Blender,Unity3D
